Zoho eProtect

Safe link checklist

Before clicking

- Hover over the link to see the redirection.

- Double-check the domain name.

- Avoid clicking shortened URLs.

- Verify if the sender is genuine.

- Don't click if the link is unwarranted.

- Type important URLs manually (banks, email accounts, etc.).

After clicking

- Ensure the connection is secure (e.g., https://).

- Check if the webpage matches the brand theme.

- Don't enter personal information if you're suspicious.
