

Zoho
One

(vs)

odoo

Pick the better Business Management Software

At first glance, you might place Odoo and Zoho One within the same bracket. Let's try to change that.

Boasts more than 45 applications on its platform. A deeply and holistically integrated BMS, Zoho One provides end-to-end business solutions hosted completely on the cloud.

Every application in Zoho One is a stand-alone product, each backed by years of intense research and development. The Zoho One platform is as deep as it is broad. Each business function has a consecutive application that works in tandem with the other.

vs

odoo

An open-source suite of software, with tools including CRM, ecommerce, accounting, manufacturing, and project management. It provides both subscription-based proprietary software and cloud-hosted SaaS. Its current architecture allows business users to create various modules and showcase them in the marketplace to be used freely. Odoo hosts about 30 core applications across business functions as official modules.

Zoho One

One-stop business management software solution for all your processes

“

Zoho has become our admin team, our pseudo accountant, our sales support, our client support system, and an intrinsic part of our business structure. It's like we employed a business solution that actually does the work for us in a lot of instances.”

Stuart George

Founder and Creative Director,
CKP Creative
