

Supercharge Customer Support

For Your Business

What is Zoho SalesIQ?

Step up your support game using a real-time communication platform and generate happier, more successful customers.

Why use SalesIQ for your support team?

- Instant engagement for increased customer satisfaction.
- Intelligent automation to scale your support teams.
- One-click integration to convert chats to tickets.

Proactively support your customers

Don't wait for customers to reach out to you for help. Start conversations with customers on high-intent pages.

 Patricia

Hey there, welcome to Zealshoot!
Having trouble with your purchase?

 Peter

I cancelled it cause my payment
didn't go through.

If **action performed** is **cancel order** and
if **current page title** contains **payment**
send **Chat invite** after **10 seconds**

Auto-assign conversations

Smartly route conversations based on the customer's query to the right team for corrective solutions.

Reward Team

 Patricia

Hello Peter! Could you please share the
particular information you're looking for?

Pass on chats

Unable to solve? Transfer chats to the right team and help customers more quickly.

 Patricia

Okay, we got you on track. I'm transferring you to my teammate who'll help you much better. Hold on a sec!

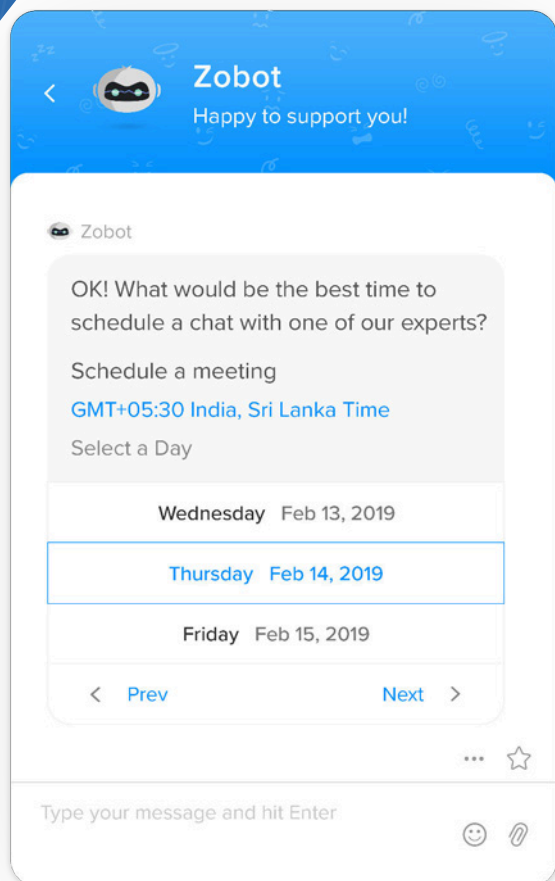

Chat Transferred. Hi Natalie here!! I'd be happy to assist you further

 Natalie

Hello Peter! I see you have a problem with the delivery. Could we take this on a call?

 Peter

Yes, sure.

Automate resolutions

No matter how many customers, Zobot provides instant solution and support to customers around the clock.

Voice your solutions

Sometimes, assisting gets out of hand. But when customers talk to a human they gain trust over the brand, thereby boosting customer satisfaction.

Respond and ticket instantly

Support customers using real-time messaging and seamlessly convert an ongoing chat into a ticket. Help customers who may have fallen through the cracks by assigning them as tickets.

#1293 How can I help you today? 10:47 PM by Peter - peter@zylker.com	
Zobot	Hi Peter! Welcome to Zealshoot. How can I help you today?
Peter	Order status
Zobot	It's on the way. ETA: 5 days.
<i>Zobot is transferring this chat to Support Patricia has accepted the chat</i>	
Patricia	Hello Peter! How can I help you today?
Peter	My order status says 5 days more but I had paid to get it delivered earlier.
Patricia	Don't worry, I'll help you with this.
Peter	Yes, I guess so.
Patricia	Okay, we got you on track. I'm transferring you to my teammate who'll help you
<i>Patricia is transferring this chat to Natalie Natalie has accepted the chat transfer. The chat has now been transferred to Natalie</i>	
Natalie	Hello Peter! I see you have a problem with the delivery. Could we take this on a

How to install Zeal in my website?

Add Zeal code in you website to get started with real-time customer engagement.

The Zeal code will appear in the Zeal welcome page. You (or your webmaster) have to Copy the code from the welcome page.

If you wish just to track your website visitors and not to insert the live chat widget on your website, then remember to uncheck the Add Live Chat box below the code snippet. By default, this option will be enabled/checked.

In your website's source file, Paste the code snippet into your existing code anywhere before the </body> tag.

Keep your team informed

SalesIQ-Desk integration lets your support team always have an eye on the ticket's conversation transcript.

The screenshot displays the SalesIQ-Desk integration interface. The top navigation bar includes tabs for TICKETS, KB, CUSTOMERS, TASKS, REPORTS, COMMUNITY, SOCIAL, and CHAT. The main interface is divided into three sections:

- Left Panel (Ticket List):** A list of tickets with details such as customer name, time, and subject. For example, Peter's ticket (#102) is highlighted, with the subject "Hi, I'm unable to make the payment. Please help!".
- Middle Panel (Ticket Details):** Displays the details for the selected ticket (#102). It includes the customer's name (Peter), email (peter@zyiker.com), assigned agent (Natalie), status (Open), due date (12 April 2019 11:02 PM), phone number (+1 (647) 839-7423), product name (Camera), priority (High), and classification (Problem). There are "Save" and "Cancel" buttons at the bottom.
- Right Panel (Conversation Transcript):** Shows the chat history for the selected ticket. The transcript includes messages from the customer (Peter) and the support team (Zobot, Patricia, Natalie). The messages are timestamped and include a "11:02 PM" marker. The transcript shows a conversation about a payment issue, with the customer asking for help and the support team providing assistance. The transcript ends with the customer saying "Thanks much!".

At the bottom of the interface, there are buttons for "Apply Macro", "Remote Assist", and "Close Ticket".

Assist your customers from anywhere

Support customers and convert tickets on the move with our mobile app.

Supercharge your mobile app

"62% of the customers expect live chat when they visit a mobile app"

When they're on the move, customers can still reach you through our Mobile SDK so they can get support anytime, anywhere.

After embedding Zoho SalesIQ on our website and operational platform we are closing deals faster and the customer support never was so efficient. With [Zoho SalesIQ](#) we raise the bar of customer relationship.
