

# Service Specific Subprocessors

Zoho uses certain sub-processors and content delivery networks to assist it in providing the Zoho Services as described in the [Data Processing Addendum](#) (DPA).

## What is a Sub-processor

A sub-processor is a third party data processor engaged by Zoho, who has or potentially will have access to or process Service Data (which may contain Personal Data). Zoho engages different types of sub-processors to perform various functions as explained in the tables below.

## Process followed to on-board a Sub-Processor

Zoho evaluates the security and privacy practices of sub-processors whom we wish to contract to ensure that they are in line with Zoho's information security and privacy standards. We then execute appropriate data protection agreements with them.

Entity Name	Purpose	Location of Processing	Applicable Data Center	Applicable For	Applicable Services

Yodlee					

**Note:**

- If you enable the TFA settings(SMS method) for your Zoho Account, irrespective of the Zoho services that you use, the sub-processor associated with Zoho Account(for sending the SMS) will be utilized.
- If you use our suite of applications such as Zoho One, "Plus" suites, then the sub processors associated with each of the respective products in those bundles would apply as mentioned in the above tabular column.
